## **Infima Technologies has signed OEM agreement with Top Image Systems**

Infima Technologies representatives (“Infima”) have announced today that they have signed a significant OEM deal with Top Image Systems. TIS is a public company that is being traded in NASDAQ (symbol: TISA) and on TASE and considered to be one of the world leaders in information capture & management systems.

The deal includes implementation of Infima’s unique compression engine in TIS popular eFLOW™ that will compress the scanned document especially the full color Hi Resolution document imaging in order to faster transport them along the network.

TIS develop and supplies software solutions for the identification, process and management of digital information that an organization receives from a variety of channels. TIS develop and market “eFLOW™” a platform solution for large organizations that perform as a platform for all the company’s products: “**Integra**” – for built in documents, “**Freedom**” – for semi built in documents such as invoices, bills, check and “**Smart**” – for emails, contracts and letters. TIS have offices in Israel, Germany, England, Japan, Singapore and the USA. TIS products are marketed in more than 40 countries and among its customers are: FedEx, Deutsche Bank, Deutsche Post, HSBC, Citibank, Coca Cola and governmental offices around the world.

Avshalom Cohen, Infima’s VP Marketing & Sales, stats that “Infima solution allows TIS customers to save precious time & money in relation to the scanned documents storage & transformation.” We are very pleased to collaborate with a worldwide technology leader such as TIS and hope that by adding our compression solution we will allow them to successfully provide their customers with advanced technological solutions.

Infima Technologies Is an Israeli start up which developed innovative lossless compression algorithm that allows compression & decompression to all kinds of data in an impressive ratio and speed. Infima’s compression algorithm allows recompressing already compressed data such as Jpeg, PDF, Mpeg and more. Currently the company provides leading compression solutions to leading developers to be implemented in a variety of applications.

Infima, which employs a small team in Israel, was established in 2006 by Nir Halwani, Lilia Demidov and "YAM Business Opportunities" a business development & entrepreneurship company. This is the second major deal for Infima after successfully implementing its image compression solution into Yahoo's servers. This solution decreases YAHOO PIC's huge image storage space by about 20% (Currently "Flicker") and by that decreases dramatically its storage & transportation costs. The deal with TIS is the first this year for Infima and it's on its way to sign two more OEM deals with worldwide leaders that have Israeli R&D centers that have worked closely with Infima for quite a while.
